To whom it may concern

Received company-wide “Eco Rail Mark” certification

Nissan Chemical Corporation (Head Office: Chuo-ku, Tokyo; President: Kojiro Kinoshita) announces that we received company-wide “*Eco Rail Mark” certification from the Administration and Screening Committee of Japan’s Ministry of Land, Infrastructure and Transport as a company that introduces environment-conscious rail freight transport.

We have positioned “countermeasures to address climate change” as one of material issues and push forward reduction of greenhouse gas emissions and saving energy. As the part of these activities, we promote modal shifts in order to rationally use energy for transportation, working together with Nissan Butsurey Co., Ltd., a group company which handles our logistics operations.

We strive to protect the global environment under our philosophy, “We contribute to society in harmony with the environment, based on our excellent technologies, products and services” in the future.

* “Eco Rail Mark”

The “Eco Rail Mark” system aims to contribute to the ecology movement by encouraging more consumers to support businesses who actively use railway freight transportation. We believe that the promotion of the “Eco Rail Mark” system improves the knowledge of manufacturers and consumers about the effort to reduce environmental burdens and also forwards modal shift to railway transportation.
