Nissan Chemical Industries, Ltd.

To whom it may concern:

Development of room temperature gelling stretchable hydrogel AQUAJOINT

Here, we announce the development of the two-liquid mixing type room temperature gelling stretchable hydrogel, AQUAJOINT, jointly with RIKEN.

Water-soluble components in this product can form a gel with a three-dimensional network structure when the product is left at room temperature after mixing the two water solutions. Various components are added to this solution to fulfill the customer's needs.
