Selected as a Constituent of FTSE Blossom Japan Sector Relative Index

Nissan Chemical Corporation (Head Office: Chuo-ku, Tokyo; President: YAGI Shinsuke) announces that we have been selected as a constituent of FTSE Blossom Japan Sector Relative Index.

FTSE Blossom Japan Sector Relative Index, created by the global index and data provider FTSE Russell, is designed as a sector neutral benchmark that relatively reflects the performance of Japanese companies demonstrating strong Environmental, Social and Governance (ESG) practices in each sector. In addition, to promote the transition to a low-carbon economy, the index includes only those companies whose improvement efforts are evaluated by the Transition Pathway Initiative (TPI) Management Quality Score, especially if the companies emit large amounts of greenhouse gas.

FTSE Blossom Japan Sector Relative Index is adopted by the Government Pension Investment Fund (GPIF) as one of the indices utilized for making their ESG investments.

Based on our corporate philosophy "We contribute to society in harmony with the environment based on our excellent technologies, products and services", we will contribute to the sustainable development of society by further enhancing and strengthening our ESG initiatives through our business activities.
